Fuku Optimized Job Posting Workflow (Step-by-Step)

1. **Create a Job Post**
   - Start by choosing **"Create Job Description with AI"** or **"Upload JD"**.
2. **Complete the 5-Step Setup**
   - Provide the required details in 5 guided steps.
   - **Important:**
     - **Title & Keywords** → Crucial for AI to generate the most accurate and effective JD.
     - **Company Name** → Should match the **relevant hiring entity**:
       - Recruitment firm users → use the relevant firm LinkedIn ID.
       - End client users → use the actual client's company name.
3. **Review & Finalize**
   - After the 5 steps, you'll be taken to a **final confirmation page**.
   - Make last edits to refine the job posting before publishing.
4. **Post to LinkedIn**
   - Select **"Post Job to LinkedIn"**.
   - Enter the **Company URL**.
   - Specify the **email address** where candidate CVs should be forwarded.
